

# Rest easy, with cargo care from Daikin Active CA

## DAIKIN Active CA

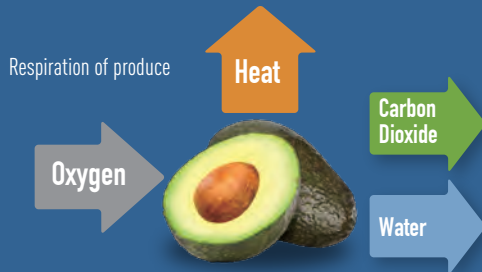

### Active CA leads market expansion

Unlike passive systems that rely on the cargo's respiration, Daikin Active CA injects N<sub>2</sub> rich gas into the container, which "actively" reduces the O<sub>2</sub> concentration and manages the CO<sub>2</sub> to its optimum level of the container atmosphere.

### Controlled Atmosphere

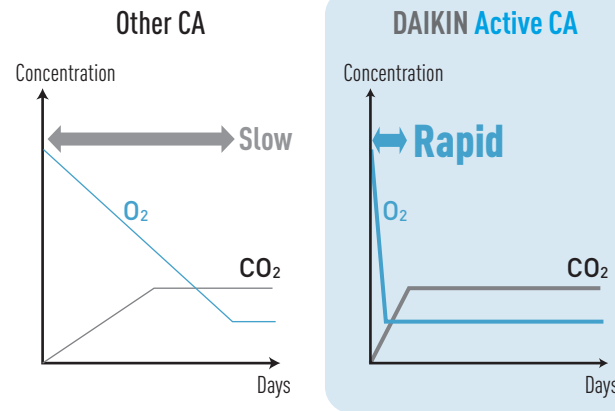

- Perishable cargoes respire, which accelerates produce maturity and shortens storage life
- To reduce respiration, the Oxygen content must be reduced

Daikin Active CA does this faster than other systems

## NEW CARGO, NEW ROUTES

### Fast reduction to 5% O<sub>2</sub> level

### Expanded cargo range

From high respiring avocados and bananas to low respiring leafy vegetables, deliver them as if they were just picked, to your desired destination.

## HIGH QUALITY, HIGH VALUE

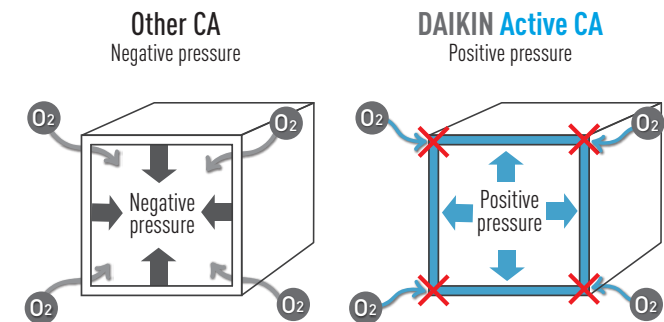

### Humidity maintenance

- Maintains high moisture content for better quality
- Higher fruit weight at destination

### Sustaining positive pressure

- Blocks ambient air ingress
- Ensures optimal CA and temperature control

Extend CA application due to higher air leakage tolerance

## EXPAND YOUR CHOICES WITH DAIKIN ACTIVE CA

ZESTIA SERIES

LXE SERIES

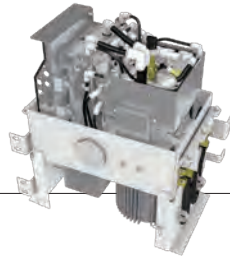

### Sensor Box

- O<sub>2</sub> sensor
- CO<sub>2</sub> sensor

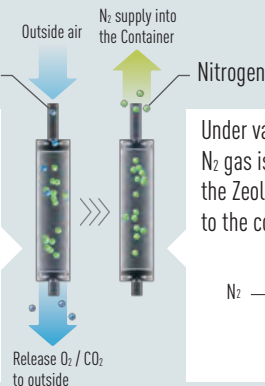

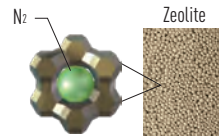

### Air Pump Ass'y

- Air pump
- Air pump motor
- Control valves
- Adsorption cylinder
- Print circuit board

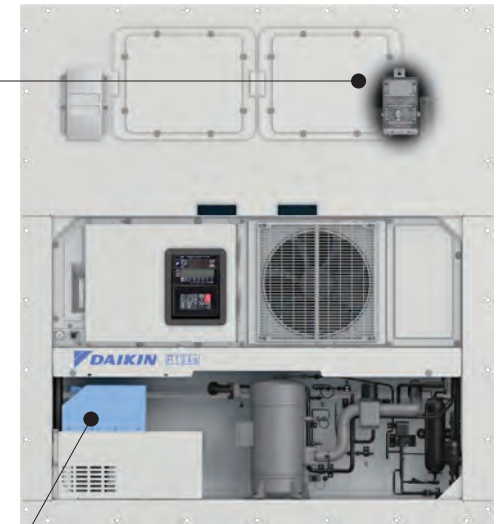

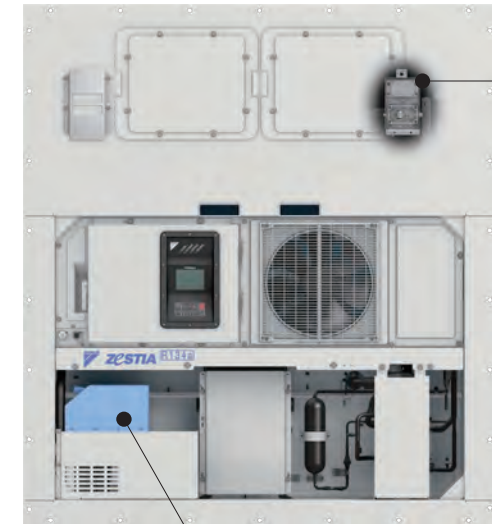

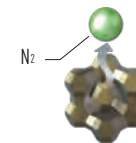

### Adsorption Cylinder

Zeolite Adsorbs N<sub>2</sub> gas under pressurized conditions. O<sub>2</sub> and CO<sub>2</sub> are released

Under vacuum conditions, N<sub>2</sub> gas is released from the Zeolite and charged to the container

### DAIKIN INDUSTRIES, LTD.

Head Office: Umeda Center Bldg., 2-4-12, Nakazaki-Nishi, Kita-ku, Osaka, 530-8323 Japan  
 Tokyo Office: JR Shinagawa East Bldg., 2-18-1, Konan, Minato-ku, Tokyo, 108-0075 Japan  
 Rotterdam Office: Fascinatio Boulevard 562 2909 VA Capelle aan den IJssel, The Netherlands
